U.S. ARMY ARMAMENT COMMAND

UNIROYAL AND THE JOLIET ARMY AMMUNITION PLANT

The Joliet Army Ammunition Plant has played a major role in the defense of our country and all free nations throughout the world since it first began operations in September of 1941. Today, it continues to supply our nation's needs through advances in plant modernization and operating efficiency.

Modern innovations and technology are employed in the new Acid and TNT production areas as safety, quality, quantity, and environmental controls far surpass previous methods of production.

The Joliet Army Ammunition Plant, operated by Uniroyal, Inc. for the U.S. Army Armament Command, is proud of its history, and stands ready to answer any crises that our nation may face.
